

GEOLOGIC TRANSECTS ACROSS CORDILLERAN MEXICO

CONTENTS

FOREWORD

Dante J. Morán Zenteno iii

FIELD TRIP 1, MARCH 28-30

Pliocene sedimentary units and tectonic evolution at the Santa Rosalía- Loreto region, Gulf of California

Jorge Ledesma-Vázquez and Markes E. Johnson 1

FIELD TRIP 2, MARCH 29-31

Ridge-trench interactions and the ongoing capture of the Baja California microplate—new insights from the southern Gulf extensional province

John M. Fletcher, José Antonio Pérez-Venzor, Gerardo González-Barba, and J. Jorge Aranda-Gómez 13

FIELD TRIP 3: APRIL 5-7

Geology of northern Sierra Madre Occidental, eastern Sonora and western Chihuahua, Mexico

Jaime Roldán-Quintana, Thierry Calmus, Fred W. McDowell, Ricardo Amaya-Martínez, and Hervé Bellon 33

FIELD TRIP 4: APRIL 5-9

Continental edge tectonics of Isla Tiburón, Sonora, Mexico

Michael Oskin and Arturo Martín-Barajas 53

FIELD TRIP 5: MARCH 25-30

Cenozoic volcanic-tectonic development of northwestern Mexico—a transect across the Sierra Madre Occidental volcanic field and observations on extension-related magmatism in the southern Basin and Range and Gulf of California tectonic provinces

José Jorge Aranda-Gómez, Christopher D. Henry, James F. Luhr, and Fred W. McDowell 71

FIELD TRIP 6: APRIL 5-8

Three superimposed volcanic arcs in the southern Cordillera—from the Early Cretaceous to the Miocene, Guanajuato, Mexico

José Jorge Aranda-Gómez, Martha M Godchaza, Gerardo de Jesús Aguirre-Díaz, Bill Bonnichsen, and Juventino Martínez-Reyes 123

FIELD TRIP 7: MARCH 30-31

Basaltic volcanism and submarine hydrothermal activity in Punta Mita, Nayarit, Mexico

Rosa María Prol-Ledesma, C. Canet, Gustavo Tolson, Armando García-Palomo, R. Millet, MA. Rubio, R. Torres-de León, and J.S. Huicochea-Alejo 169

FIELD TRIP 8: MARCH 31

The Puerto Vallarta Batholith and Cuale Mining District, Jalisco, Mexico—high diversity parenthood of continental arc magmas and Kuroko-type volcanogenic massive sulphide deposits

Peter Schaaf, Brian V. Hall, and Thomas Bissig 183

FIELD TRIP 9: APRIL 4-6

Geology and tectonic evolution of fue western Guerrero terrane—a transect from Puerto Vallarta to Zihuatanejo, Mexico

Elena Centeno-García, Pedro Corona-Chávez, Óscar Talavera-Mendoza, and Alex Iriondo 201

FIELD TRIP 10: APRIL 4-7

Main geologic and biostratigraphic features of the Cretaceous of southwestern Mexico (Guerrero terrane)

Jerjes Pantoja-Alor and J.A. Gómez-Caballero 229

FIELD TRIP 11: APRIL 4-6

Tertiary magmatism and tectonic deformation along the Cuernavaca-Acapulco transect

Dante J. Morán-Zenteno, Barbara Martiny, Leticia Alba-Aldave, Enrique González-Torres, Teodoro Hernández-Treviño, and Susana A. Alaniz-Álvarez 261

FIELD TRIP 12: APRIL 4-10

Paleozoic and Precambrian rocks of southern Mexico—Acatlán and Oaxacan complexes

J. Duncan Keppie, L.A. Solari, Fernando Ortega-Gutiérrez, Mariano Elias-Herrera, and R.D. Nance 281
